

Submission complete

Thank you for contacting District 1.

Sukh Kaur,

I am a licensed attorney at law here in San Antonio, and I am writing to notify your office of an ongoing problem in our district. The time is currently 2:57am as I take the initiative to write your office. My wife and I are experiencing a 24/7 operation to spy on us inside of our home that is originating from the partnership between the United States Space Force and SpaceX, and the partnership between Elon Musk and Donald Trump. I am explaining these relationships to present the foundation of how this impacts your district here in San Antonio, Texas.

Since I was elected to be the Republican Party Precinct Committee Chair of my neighborhood, we have been illegally surveilled by these men and the agencies / corporations that they represent. Also since that time, we have begun to experience that a large gang of criminals are being fed information from that illegal spying presence to drive agitations into our home in the form of a private nuisance and crimes that have been committed against us.

These agitations and crimes have been directly related to my political speech and my efforts to use my First Amendment rights and other legal rights to hold this criminal conspiracy accountable both by public awareness and legal actions against them. This morning, for example, I am up and reviewing the Agenda items for the upcoming City Council meeting and this prompted loud vehicles to begin their agitation process against our home.

Our home is located in your district and I have notified the San Antonio Police on multiple occasions now about the crimes and nuisances that are being caused against our home by this large gang of criminals. I want to present to you how this criminal conspiracy works so that you can begin to address it in any way that you can.

1. We are being illegally surveilled by the SpaceX 'StarShield' program that is paired up with the United States Space Force to track targeted individuals around the world; This illegal surveillance includes both our digital work on our phones and computers as well as our movements around our own property and around the world (We experienced this exact same problem in Periana, Spain as we attempted to escape this unlawful conspiracy earlier this year);

2. These illegal spies are then relaying signals to a large group of people that are driving countless cars, trucks, and motorcycles around the area near our home to express their anger with my work through the engine sounds of those vehicles; For example, while I wrote the text of item 1, at 3:08am, there was a loud motorcycle that revved up its powerfully loud engine near our home seemingly as an indication of the powerful nature of their agency; This is a regular and recurring feature of this spying and intimidation campaign;

3. These illegal spies are also employing people to move about in our area physically as we move about the city, state, and world; These spies are controlling people as 'pawns' to place in front of our family as we carry out our normal business; The effort slows us down, frustrates us, and acts as a messaging board to express 'sign language' threats that harm is headed our way;

4. We are being threaten; On August 08, 2024, at our house at 604 Westwood Drive, in your district, a man threatened me in my front yard with a gun and shot that gun into the yard near my feet; I reported this to the San Antonio Police Department and I have footage of the incident saved on my computer; At this very moment (3:12am) another vehicle is loudly driving past our home to reiterate that we are being surveilled and surrounded by these criminals on a 24/7 basis (the combined effect of the constant vehicle traffic driving past our home, combined with people that are personally following us everywhere that we go, and further combined with the expressed and implied threats of harm against us, distinctly feels like an attempt to place us in an actual or apparent false imprisonment);

5. These illegal spies and gang of pawns that are operating in your area are then using this method to 'swarm' around my life at all times causing an 'echo' response for everything that I do that irritates them or causes them discomfort; These items of irritation and discomfort include things as mundane as reading the news (because that allows me to remain informed about their ongoing criminal operations), and becomes dramatic when I am more involved (reading City Council agendas, contacting my political representatives, and working on the lawsuit that I am filing to defend my rights to privacy and peace in our home).

I am truly saddened to have to share this problem with you, but as law abiding citizens, this is one of very few options that we have left to hold these criminals accountable.

I am requesting that your office begin an investigation into this matter by gathering the police reports that have been filed around my house here at 604 Westwood Drive. Since

last year, my neighbors have embarked on a campaign of intimidation to discredit my opinions as soon as I began speaking out about this criminal campaign. I am referring to military veterans that are living near my home that are being prompted to participate in this unlawful conspiracy.

I am requesting that your office being investigating how the United States military presence in San Antonio, Texas has facilitated a network of political oppressors in our area. These intimidating messages began from military veterans very close to our home and inside of our own family. These messages include the use of federal government employees and former employees. This is absolutely a conspiracy of criminals that is originating from within the United States government and their offices inside of San Antonio, Texas, and it is expanding to include and control a worldwide network of criminal gangs!

I am horrified and appaled to read the words that I am writing to you and I hope that you feel the same way.

This is a horrific abuse of our government privileges and it must be curtailed immediately for the safety and security of citizens within our area and your district. We are reaching out to you to inform you of the very real and very pressing challenges that we are facing to have our vioces represented in the world today.

Please begin looking into this problem. Please contact SAPD and encourage them to patrol the streets immediately surrounding our home. Please begin to gather evidence against this gang of criminals that are driving "Trump Trains" of cars around our home in an intimidating fashion as I write this message to you right now - at 3:24am! This problem begins the moment that I wake up and persists non-stop throughout every single day for years now.

There is a major criminal conspiracy taking place in your district and this email may be the first that you are hearing about it. I am assuring you that I have been collecting photos, journals, videos, and other evidence against this team of criminals for at least two years now. Please gather the police report SAPD24171554 to see that the items I am listing are very real and very dangerous to our home. We were threatened by a man with a deadly weapon in our front yard to stop us from filing a lawsuit and testifying to these facts in court against Donald Trump and the Republican Party of Bexar County, Texas!

This is the lowest our government should ever fall. We must begin the hard work of holding these threatening criminals accountable for their actions and you are a part of this process. I am writing the letters, I am living through the daily aggravation and agitaton, and all that I am asking of you is to do your job to represent the people of your district.

I have brought this matter to your attention and I am supplying you with actual, verifiable, facts about a serious felony that was committed inside of your district to intimidate political speech. This letter must not be ignored or pushed off after reading.

Please take the time to investigate. Please take the time to learn about the relationship between SpaceX, the United States Space Force's 'Star Shield' program, Donald Trump, and Elon Musk to see how they are carrying out a very serious illegal spying campaign against at least one home in your district. Please use this information to hold the United States military accountable for its illegal and harmful actions that it is facilitating in San Antonio, Texas.

Thank you for taking the time to read this email to to investigate these facts. We must all join together now to protect our community from a cancerous development of criminals inside of the United States government.

Kindest regards,

Chris Carlin
